

ELON MUSK

INTRODUCTION: -

Elon Musk life story begins in South Africa, where he was born. He was also one of the original major investors in and the CEO of Tesla, an electric car company. He was born in 1971 to Maye Musk and Errol Musk whom Elon has described “a dreadful human being”.

ELON MUSK EARLY LIFE: -

Musk was born in Canada to a Canadian mother and a South African father. He grew up with his head stuck in books and computer. He developed video game at the age of 12 and sold to computer magazine. Musk left SA in 1988 after getting a Canadian passport because he refused to support apartheid through compulsory military duty and wanted to pursue the higher economic prospects offered in the United States.

ELON MUSK QUALIFICATION: -

He travelled to Canada at the age of 17 to attend Queen’s University and evade military service in SA. Musk moved to the United States in 1992 to study business and physics at the university of Pennsylvania. He earned an UG in economics before getting continued on to earn a second bachelor degree in physic. Musk went to Standford University in California to earn Ph.D. in physics. But that Ph.D. couldn’t make it to Elon Musk Degrees since he walked out of Stanford after only two days to start his first firm.

ELON MUSK WORKS: -

In summer 1995, he relocated to Silicon Valley for Ph.D. studies but he dropped out after joining in two days. His younger brother recently graduated with a business degree and he travelled to California with him. They decided to develop a company called Zip2, an internet business directory with maps.

Zip2 thanks to the brother’s efforts because they receive recruited angel investors and grew into profitable zone. It was sold to Compaq for \$307 million in 1999. He creates his own financial service company. X.Com. In October 2002, Ebay the online auction site, purchased Pay Pal for \$1.5 billion in Ebay Stock.

Since leaving PayPal, he has founded, co-founded and/or led companies focused on addressing three distinct existential risk to humanity's long-term survival: Climate risk, single planet dependency risk and human species obsolescence's risk. Two of these company Space X and Tesla Motors he risked his entire early fortunate to build.

FACTS ABOUT ELON MUSK AND HIS INVENTIONS: -

Tesla Motors, a firm that designs and manufactures electric sports automobiles was co-founded by Musk. Tesla were able to flourish where other significant manufacturers failed in the electric vehicle sector. He is presently Tesla's CEO and chief product architect.

The National highway safety Administration gave Tesla Model S a 5.4/5 safety rating, the highest ever given to a car. He created SpaceX a corporation that designs and manufactures space launch vehicles with a concentration on rocket technology. His goal is to lower the cost of space travel in order to expand human life beyond the Earth.

He struggled to raise funds for SpaceX which investors dismissed as a pipe fantasy. Musk put all of his personal funds into Space X in order to make it a reality.

CONCLUSION: -

He has shown entrepreneurial inclination since he was a child. He pursued goals that have motivated not only himself but also the team of the people he has engaged to work with whether it's interplanetary space flight or vehicle these objective are all geared toward the future and dramatically improving existing condition.
