you lose the right to complain”**

-GEORGE CARLIN

My vote My right is one of the most important pillars of democracy. It is the compulsive duty of a person in a democratic nation. To fulfil our duty to vote must come from within. The concept of voting is related to the process, in which individuals can express their political opinion. Most people still are not aware of their right to vote in many undeveloped areas of the country. To awake them, there must be awareness programs to be conducted at different places so that they can realize the concept and come up with decision to use their power to vote. So, My Vote My Right must be understood and used by every citizen at the country.

POWER OF ONE VOTE: -

My vote is so precious that it can indeed impact on future leadership of my region or village because my single vote can actually help a candidate to lead. In history, we know that several incidents were candidates won elections by just a single vote; undoubtedly that's real power of a vote.

Those who haven't recognized the importance of a single vote or those who avoid taking participation in voting in elections should understand this and start to contribute to our country's growth by choosing the right leaders. So, make sure if you're 18 years old or above just go vote, you can indeed do great work for society.

CONCLUSION: -

All democratic nations have come up with the concept of voting. The reason is that most of the things are decided and selected through elections. When it comes to the selection of political parties, it is through the voting system that they get elected.
