

## POWER OF YOUTH

### ***Introduction:***

In the building of any country, the main role is played by its young generation. In any field from sports to education to politics youth are the ones who is ruling the nations. Youth are considered the energy of the nation and healthy youth is the symbol of a healthy nation. If you considered youth from the time of independent struggle. There are some names everyone will remember like shaheed Bhagat Singh, Chandra Shekhar Azad etc. These are those people who believe that dying for the sake of the country is much more respectable than living for it. If you considered sports India had produced some great sports personality who has proved themselves in their fields. P.T.Usha Milkha Singh etc. are somenames. You can say that youth can achieve anything if they put their brain and muscle into a single target. If doesn't matter if that is the field of sports, academics of the freedom struggle. Indian youth have proved themselves, again and again in every field.

### ***Qualities:***

As youth is full of energy and enthusiasm. We can compare youth with a river which is coming out of its origin. A river which has a strong flow with immense power at its disposal to shake the odd stubborn rock from its path we can put the young river and the power of youth in the same parameter. Youth who are on the right path with the mindset is a gem for the nation.

### ***Nation Building:***

There is no one who has the power to stop that country to achieve Success. The time of youth is that crucial point in the life of the person as the future of the nation depends on it. A youth who ends up consuming all their energy. Enthusiasm, and time in the bad habit of drinking. Smoking, and other things etc.They are the ones who gonna ruin the future of themself as well as of the nation.

### ***Conclusion:***

India is one of those countries that have a bright future in the world as it is full of young blood and enthusiasm. All nations all around the potential of the Indian youth. As of now, India is on its path to becoming one of the biggest economies in the world.
