

YOUTH FOR GREATER HEIGHTS

Youth is a beautiful stage of everyone's life. It's the phase in which small children have come out of their protective shell and are ready to spread their wings. The stage which blooms only for a short period is the foundation for the next stage of life. And this is the stage where we start our race to reach our future god. It is in the hands of the youth to decide whether to take their journey in the road of positive flowers or the road of negative flowers. The fragrance of the positive bloom self-confidence, hard work and courage which helps in building our nation.

Education is important in everyone's life. It helps a person to improve their confidence and get knowledge all through their life. It plays a great role in our personal growth.

“Education is the most powerful weapon which we can use to change the world”

-NELSON MANDELA

If the youth get a proper education, it has the power to change the entire nation. So youth should focus on their education and build a bright future for themselves and for their country.

Unfortunately today's youth make their journey difficult by making themselves run on the road filled with stones and thorns. The main reasons for the difficult journey to their way to success is their addiction to mobile phones. If the youth are aware of this dangerous pit, then they acquire the strength to avoid the pit.

So, youth have a lot of difficulties in their way to success. But they are also gifted the strength to overcome every struggle in life. They should work smartly to achieve success in their life.
